

The high performance marque

In blends or 100% Trevira, as attractive as in nature

[In perfect harmony, like Trevira Perform]

The high performance marque

Basis for long-lasting, functional and prestigious, low-pill fabrics. In blends or by itself, the perfect balance between looks and comfort.

In menswear

- ◆ ideal for that feeling of well-being
- ◆ low-pill and good handle
- ◆ dimensionally stable

In ladies outerwear

- ◆ well-being and comfort
- ◆ perfect for care
- ◆ hardwearing and light

INFINITE POSSIBILITIES

Trevira Perform is the base for long lasting low-pill, functional and prestigious fabrics. Fabrics, costumes, suits and trousers look outstanding, because they are capable of so much. They always retain their shape, are easy care, low-pill, hardwearing and crease resistant. Trevira Perform blends in everywhere: with wool and viscose, linen and cotton, with silk and naturally used on its own in 100% Trevira. Its feel, looks and flow can always be precisely controlled.

FINE FOR DESIGN

Even the best names cannot escape any more: top designers are using Trevira Perform in their collections. This is because the fabrics contain special high-tech fibres that simply do not permit pilling to start, thanks to the modifications made at the molecular stage.

The positive pilling characteristics of Trevira Perform

The RTPT (Random Tumble Pilling Test) to DIN 53 867 shows Trevira Perform in comparison with normal fibres.

Pilling? develops during use and quickly makes garments unsightly.

Trevira Perform resists pilling, without the necessity for an additional finish.

In corporate wear

- ◆ good looking over long periods
- ◆ comfortable to wear at work
- ◆ ideal for keeping clean

In active and sportswear

- ◆ ideal for sports fashion
- ◆ breathable
- ◆ moisture regulating

PLEASANTLY ELASTIC

Elastomeric fibres are present everywhere, but their extreme stretch properties get out of control, if they are not reined in by other textile fibres. Trevira Perform is the perfect partner for Stretch.

Proof in quick time. Trevira Perform smoothes out naturally.

CREASES DROP OUT PRACTICALLY BY THEMSELVES

The Crumple Test shows how Trevira Perform remains naturally smooth. Even in hot and wet conditions, it is ideal for blending with natural fibres, which can otherwise crease noticeably.

PERFORM

TREVIRA PERFORM

The high p
Basis for long
stigious, low-pi
the perfect ba
fort.

- ◆ excellent low pill properties
- ◆ soft and pleasant feel
- ◆ dimensional stability
- ◆ superb ease of care

Trevira
THE FIBRE COMPANY

QUALITY WITH CERTAINTY

Trevira is the most important manufacturer of polyester fibres in Europe and, at the same time, the only one to offer the complete range from polymer to fibres and texturised filament yarns. This provides the decisive synergic advantage reflected in textile expertise in the further processing of apparel and home textiles, and technical products.

Trevira is also so successful with Perform and other marques because the high outlay on research, product development and service benefits the customer directly. Furthermore, the monitored trademark contracts guarantee quality without compromise.
